Employer feedback on curriculum:-

(2018-19)
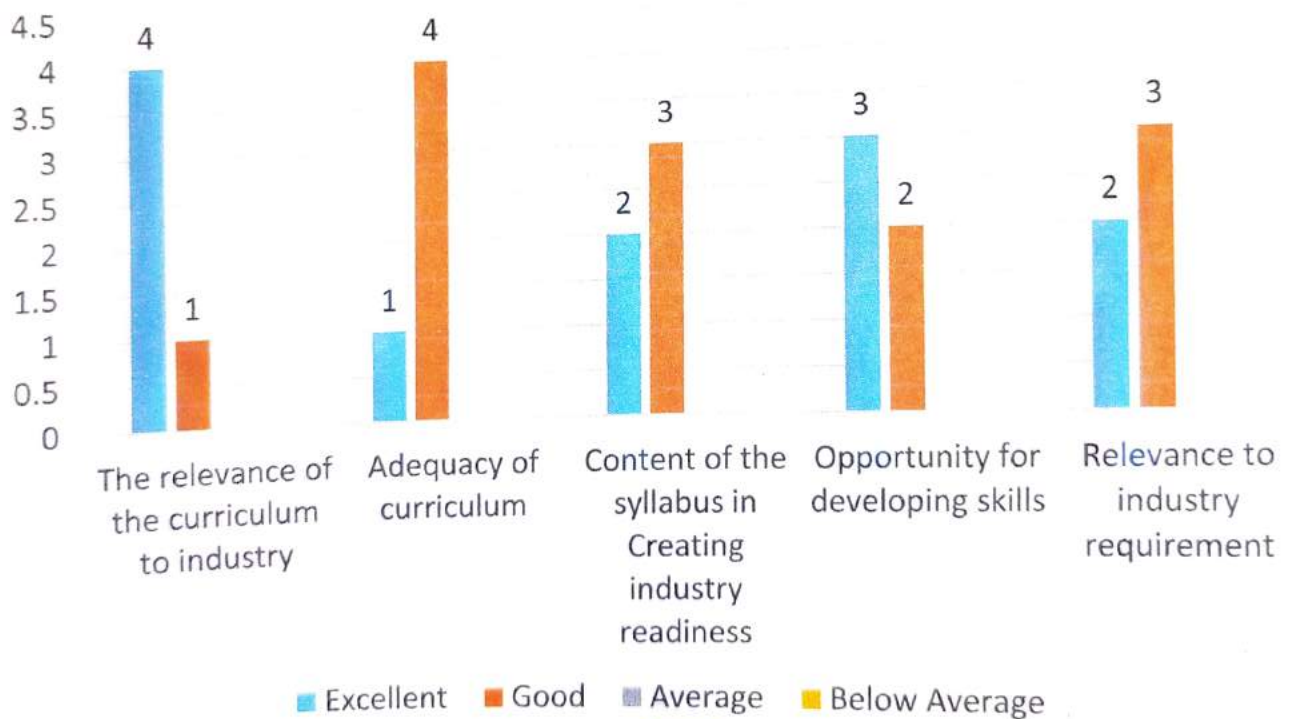

Interpretation

        The majority of the Employers are satisfied with the process of Curriculum design and development.

        They are of the opinion that the curriculum is effective in developing IT skills but the communication skills are very much weak and need to be incorporated in the curriculum properly.

        There is a need to enhance the skill by introducing a separate course in soft skills.
